-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 11 June 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zanin (US 4,576,100).

Zanin discloses a crane return system comprised of a plurality of main drive wheels 174, 176, 178 and 180 a plurality of auxiliary drive wheels 182, 184, 186 and 188. Both the drive wheels and auxiliary wheels are mounted on the crane bridge 104 and designed to move the crane along overhead rails 106. The main drive wheels are powered by prime drive mechanisms 230, 232 and are in constant contact with the rail. The auxiliary wheels are movable between a raised position and a lowered position. During normal operating modes the auxiliary wheels are raised and do not contact the rails. In the event of a malfunction of the crane assembly the crane can be returned to a starting point and away from any work zone it had entered. The auxiliary wheels are lowered onto the rail 106 by activation of a hydraulic cylinder assembly 212, 214, 216 or 218 associated with each auxiliary wheel. The hydraulic cylinder assemblies are activated and controlled from a hydraulic manifold 225 which is mounted to the exterior of a control cabinet on the crane assembly. The system is further comprised of

secondary and tertiary drive mechanisms and control the drive capabilities of the assembly should the primary drive malfunction.

Regarding claims 20-26 drawn to the method of operating the assembly. It would have been inherent to understand that since the prior art of Zanin discloses the same apparatus assembly, that it would be operated in the same manner.

Zanin discloses the crane return system as described above. However, Zanin discloses that the hydraulic crane return system be activated by a worker wearing special protective equipment. It is well known in the art that many systems in industries have become automated and do not need the interaction of workers. It would have been obvious to one of ordinary skill in the art to have automated the motor and hydraulic system of Zanin with the expected result of removing the need for a worker and therefore preventing workers from entering any highly dangerous or life threatening environments like that of Zanin.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-26 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
